Education

Lycée Al Zahraoui — Rabat, Morocco
Preparatory Classes — *Sep 2024 – June 2025*

ENSEEIHT — Toulouse, France
Science du Numérique — *Aug. 2025 – Present*

Experience

Freelance / Independent Client Work — August 2022 – 2024
El Jadida, Morocco

- Managed direct client communications, coordinated project deliverables, and ensured timely completion of customer requests.
- Handled digital asset organization, multimedia tasks, and multi-platform problem solving.

Projects

Simath | *C++, Win32, ffmpeg, OpenAL, Docker* — June 2023 – Present

- Useful terminal application that renders 3D and 2D in the windows legacy console
- Implementation and demonstration of various mathematical/physical concepts I learned
- Well documented examples and optimized performance

Model Compressor | *Python, NumPy, VisPy, Matplotlib, Git* — Sep 2025 – Aug 2026

- 3D object model lossy compression using spherical harmonics decomposition
- CLI commands and interface to use directly from the terminal

ESP32 Irrigation System | *C, Espressif, HTML/CSS, Javascript, Git, CMake* — March 2026 – Present

- A simple web application hosted on an ESP32-S3 SoC that handles irrigation
- Websockets to accomodate for multiple users simultaneously
- Simple UI, multiple features, sensor data telemetry
- Modular and cheap, expand only the number of valves

Technical Skills

Languages: C/C++, Python, Java, JavaScript, C#, SQL (Postgres), Ruby
Frameworks: React, Node.js, JUnit, Qt, Dear ImGui, Espressif
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Eclipse
Libraries: pandas, NumPy, Matplotlib, TensorFlow, OpenGL, Vulkan, SFML, OpenCV,
